

Dear Sir or Madam,

First and foremost, on behalf of the Ross Group Plc (“RGP”), I would like to very much warmly welcome you to our very first newsletter to all of our existing, new and prospective shareholders.

It is our intention to regularly update you as best as possible as to what we have achieved and are endeavoring to achieve business-wise, socially, and environmentally.

Since the Public announcement of our recent acquisition of the Archipelago Aquaculture Group, LLC (“AAG”) it is our pleasure to provide the following achievements and milestones of our AAG subsidiaries, as well as some RGP up to date information:

- In September 2018, Mari Signum Mid-Atlantic, LLC (“Mari Signum”) won the very prestigious U.S. EPA Green Chemistry Challenge Award for its environmentally innovative and proprietary method of extracting Chitin from shrimp exoskeleton shells.

- In December 2018, Mari Signum completed its first proof-of-concept Chitin pilot production utilizing the proprietary ionic liquid extraction technology and currently is in the process of optimizing the production process prior to announcing a multi-year forecast.

- To date, our RGP senior management team has been able to successfully identify several sectors in which we believe Chitin can be used; these include, but are not limited to:

- Cosmetics Industry
- Agricultural Fertilizer Industry
- Cannabis Fertilizer Industry
- Medical Wound Care
- Pharmaceutical Industry
- Medical Dental Industry
- Animal Husbandry
- Filtration Industry
- Packaging/Bottling Industry

- RGP is in discussions with certain companies regarding potential strategic alliances in respect to possible international joint ventures pertaining to Chitin production and the genetic development to enhance the quality of Chitin, up to and hopefully including pharmaceutical grade. Whilst there is nothing material to disclose at the moment, we will ensure to inform all shareholders and the Public immediately once there is an announcement of any kind.

- In connection with the acquisition of AAG, all new RGP shares have now been duly authorized and issued to Global Blue Technologies Group, Inc. (“GBTG”). It is our understanding that all GBTG-related shareholders will be receiving their respective RGP

share allocations in due course, once all regulatory procedures have been adhered to and after the new RGP shares have been admitted to trading accordingly. Please be aware that as we are a Premium Listed Company on the Main Board of the LSE (which is equivalent to that of the Main Board of the NYSE), RGP is subject to rigorous corporate governance and regulatory processes which usually take longer than most, if not all, other Stock Exchanges.

Please kindly know we are always happy to try to address any questions, queries or enquiries and do not hesitate to contact us any time at: info@ross-group.co.uk

Looking forward to an exciting future together and thanking you in advance for your patience, understanding and support as we endeavor to provide the best possible value to all of our RGP shareholders.

Sincerely,

Barry Richard Pettitt
Chairman
